

ExempleCallable (v1)

Fabrice.Kordon@lip6.fr

Objectif de l'exemple

2

Lancer deux «calculs»

-  Dans deux threads différentes
-  Associées à un pool de threads

Additionner leur résultat

facile!

La classe Calcule

3

```
import java.util.Random;
import java.util.concurrent.Callable;
import java.util.concurrent.ExecutorService;
import java.util.concurrent.Executors;
import java.util.concurrent.Future;

class Calcule implements Callable<Integer> {

    String monNom;
    private Random generateur = new Random();

    Calcule (String n) {
        monNom = n;
    }

    public Integer call() {
        Integer resultat = generateur.nextInt(1000);
        System.out.println(monNom + " rend " + resultat);
        return resultat;
    }
}
```

La «classe principale»

4

```
public class ExempleCallable1 {  
    public static void main(String []args) {  
        Integer total = 0;  
  
        ExecutorService executor = Executors.newFixedThreadPool(3);  
  
        try {  
            Future<Integer> f1 = executor.submit(new Calcule("c1"));  
            total = total + f1.get();  
  
            Future<Integer> f2 = executor.submit(new Calcule("c2"));  
            total = total + f2.get();  
  
            System.out.println("total = " + total);  
            executor.shutdown();  
        }  
        catch (Exception e) {  
            System.out.println("oulala !!! " + e);  
        }  
    }  
}
```

Exécutions...

5

```
$ java ExempleCallable1  
c1 rend 605  
c2 rend 738  
total = 1343  
$ java ExempleCallable1  
c1 rend 987  
c2 rend 108  
total = 1095
```

The image shows a terminal window with a dark background and light-colored text. The window has a title bar with three colored buttons (red, yellow, green) on the left and a maximize button on the right. The text inside the window shows two separate executions of a Java program named 'ExempleCallable1'. Each execution prints the completion status of two threads, 'c1' and 'c2', followed by a 'total' value. The first execution shows 'c1' at 605, 'c2' at 738, and a total of 1343. The second execution shows 'c1' at 987, 'c2' at 108, and a total of 1095.
